## Professional Experience

PHP Developer | GXTEC (8 months internship - March 2024)

GXTEC is a company focused on developing software for the medical sector.

- Development of new modules and systems according to client requirements (full-stack).
- Planning and development of solutions to meet specific client needs.
- Customer service for resolving system errors or answering software usage questions.
- Direct communication with clients to understand their needs and align project requirements.

## Technical Skills

Languages: PHP, Python, JavaScript (React), Git.

Frameworks: Laravel, Django.

Databases: MySQL, PostgreSQL.

## Success Examples

"One of the most rewarding projects in my career was the development of a system for the Hospital Naval. The project started with simple modules, such as material inventory management and financial control, but quickly expanded into a much more complex system. The evolution of the project resulted in notable outcomes, with a significant improvement in operational efficiency. The implementation of new features also contributed to great performance and excellent user acceptance, as users praised the solution for meeting their specific needs. **Availability**

Available full-time, preferably in the mornings.
